

Gardner Standard is a private investment firm that focuses on investing in small, middle-market companies. We trace our origin to a Minnesota-based, family-run business founded in 1884. Our heritage provides a valuable perspective that distinguishes us from most investment firms. At Gardner Standard, we understand the importance of a long-term commitment to employees and the community.

We consider investments in a wide variety of market segments such as those listed below. The fundamentals of a business, particularly its growth prospects and competitive position, are our focus rather than a specific market segment.

Gardner Standard will always be relationship-oriented. We work closely with capable management teams to enhance financial performance and build enduring businesses. We are long-term investors and do not maintain a fixed formula for exiting an investment after five, seven, or any arbitrary number of years. Our ideal investment is a business we can own and grow for the long-term.

In addition to traditional private equity investments, we target opportunistic investments in high-quality operating businesses with low-quality balance sheets.

CORE VALUES

INTEGRITY. We hold ourselves to the highest ethical standard in all our dealings. Fairness counts.

RESPECT. Recognizing, supporting, and rewarding the expertise and efforts of our management teams and employees.

COLLABORATION. We work with business owners and management teams on an equal partnership basis. Good ideas carry the day.

RESOLVE. Businesses often follow a non-linear path to success. We respond to business challenges by seizing opportunities to position ourselves for future success.

DILIGENCE. We work hard to carefully analyze investment opportunities, develop growth plans and help companies succeed. There are no short-cuts.

FLEXIBILITY. We generally invest in the form of controlling equity ownership or an influential minority equity position. We are comfortable with complex deal-structuring situations.
